MarketVector™ Decentralized Finance Index
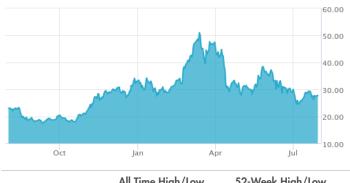

The MarketVector™ Decentralized Finance Index (MVDF) is designed to track the performance of assets classified as 'decentralized finance' by MarketVector Indexes and serves as a benchmark/universe for the respective market. It covers financial services built on top of distributed networks with no central intermediaries.

Key Features

Size and Liquidity Requirements

All digital assets of the MarketVector™ Digital Assets 100 Index classified as "decentralized finance" by MarketVector™ Indexes qualify for the index.

Review
