

The index has been designed to capture the global market of cut and polished wholesale diamond industry based on sales volume (measured by amount of diamonds) of the Top 100 traded diamonds, from most to least.

The chart illustrates the demographic trend of the 15-64 age group in the Netherlands. The population remains relatively stable until the mid-1990s, after which it shows a significant and steady decline. A sharp drop is visible around 1998, likely due to a change in data collection or reporting standards.
