

MVIS Launches the MVIS Global Video Gaming & eSports (AUD) Index and the MVIS US Listed Semiconductor 10% Capped Index

Designed to offer a complementary option in a prosperous market

Frankfurt (13 August 2020) – [MV Index Solutions GmbH \(MVIS[®]\)](#) today launched the [MVIS Global Video Gaming & eSports \(AUD\) Index \(ticker: MVESPOA\)](#) and the [MVIS US Listed Semiconductor 10% Capped Index \(ticker: MVSMC\)](#).

The [MVIS Global Video Gaming & eSports \(AUD\) Index \(ticker: MVESPOA\)](#) is a new addition to our successful MVESPO Index in the currency AUD. MVESPOA is a pure play index that tracks the performance of global companies that generate at least 50% of their revenues (25% for current components) from the video gaming and eSports sector.

The [MVIS US Listed Semiconductor 10% Capped Index \(ticker: MVSMC\)](#) is a supplement to our successful MVSMH, with the difference that company weightings are capped at 10%. The modified market cap-weighted index, tracks the performance of the largest and most liquid listed U.S. companies that generate at least 50% of their revenues from semiconductor.

“We are pleased to announce the launch of the MVESPOA and MVSMC, two new indices that extend our product range. They are each a different version of the existing MVIS Global Video Gaming & eSports Index and MVIS US Listed Semiconductor 25 and will build on their success. The pure-play strategy, which makes our indices unique, offers a new opportunity in this innovative and growing market,” said Thomas Kettner, COO at MV Index Solutions.

The [MVIS Global Video Gaming and eSports \(AUD\) Index](#) is weighted by free float market capitalisation and is calculated in Australian Dollar as a price and a total return net index. Capping factors are applied to avoid an overweighting of single index companies. The index is reviewed on a quarterly basis.

The [MVIS US Listed Semiconductor 10% Capped Index](#) is a pure-play index that contains only companies which are engaged primarily in the production of semiconductors and semiconductor equipment. The index is reviewed semi-annually.

Detailed information about the indices, including methodology details and index data are available on the [MV Index Solutions website](#).
