

COIN50 Daily Summary

The COIN50 index posted a daily return of 1.39%. Decentralized Finance led the category returns with a significant 3.83%, followed closely by Infrastructure Application and Media and Entertainment, returning 4.13% and 3.81% respectively. Over the last 30 days, the index has seen a downward trend with a return of -5.19%. However, the 90-day return paints a more optimistic picture, with a gain of 8.26%.

Key highlights:

- 1. Top Performer:** The best performing token was ZEC, which achieved a respectable return of 7.44%.
- 2. Largest Decline:** On the flip side, the token MKR experienced the largest decline, dropping by -1.49%.
- 3. Noteworthy Movements:** Other considerable movements included tokens such as FET and IMX, which reported returns of 7.30% and 6.90% respectively. It's also worth noting that Infrastructure Application demonstrated strong performance contributing notably to the index's performance. Overall, it was a mixed performance with rewards seen in some sectors despite the overall downward trend over the month.

Performance

Index and Sector Performance

Top 5 Tokens by Daily Return

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. MarketVector does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. MarketVector makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. MarketVector is not an investment advisor, and it makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document.

Investments into crypto currencies and/or digital assets are subject to material and high risk including the risk of total loss. The calculated prices may not be achieved by investors as the calculated price is based on prices from different trading platforms. Furthermore, an investment into crypto currencies and/or digital assets may become illiquid depending on the trading platform or investment product used for the specific investment. Investors should carefully review all risk factors disclosed by the relevant trading platform or in the product documents of relevant investment products.

Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other vehicle. Inclusion of a security within an index is not a recommendation by MarketVector to buy, sell, or hold such security, nor is it considered to be investment advice.

All information shown prior to the index launch date is simulated performance data created from backtesting ("Simulated past performance"). Simulated past performance is not actual but hypothetical performance based on the same or fundamentally the same methodology that was in effect when the index was launched. Simulated past performance may materially differ from the actual performance. Actual or simulated past performance is no guarantee for future results.
